

News from the Fourth Grade

Dear Parents,

Things are really moving quickly in the 4th grade. So much to do and so little time...

We are studying Physical Science currently. We will include a study of magnets and electricity, then finish our year with Life Science.

In Social our topics are the Native American tribes who first inhabited our country. Also, we have discussed making a budget and managing an income.

We are working on Capitalization and Punctuation in English class and adding suffixes in Vowac. Creative writing will include a Bio-Poem telling about themselves and letter writing.

One of the activities we will be doing at Camp Omega in May is to build a bottle rocket out of 2 liter plastic pop bottles and duct tape. We would appreciate any brand bottle so that each student gets a chance to build one. If you send it to school, I'll make sure it gets to camp.

Sincerely,

Mrs. Michele Durbahn
