

## December 2019

We have many things going on in our classroom this month! We are busy celebrating these weeks of Advent as we prepare for the Christmas season.

Each morning, we are involved with Advent activities. We are also focusing on "purity" which is our virtue for study during the month of December.

In math class we will begin a new chapter dealing with multiplication. We will be multiplying by two-digit numbers so it is essential that students know the basic multiplication facts. We are continuing to practice multiplication facts with Mad Minute and IXL as well as with accuracy tests. Five students have demonstrated mastery of the basic multiplication facts and one more student has achieved one of our two multiplication goals! Watch the Friday Folder for weekly updates.

Please try to check your child's planner and HOME folder each night as there may be a communication for you. Thanks!

Blessings on a joyous holiday season,  
Jennifer Kugath
