

February 2020

Dear Parents,

We had a fun-filled Catholic Schools' Week! Many special events were enjoyed including building snowmen, a special art project, dressing up as a character in a Disney movie, and a movie with our friends!

In math, we have been working with division. We will be exploring a variety of division algorithms, but for right now are concentrating on the partial quotients algorithm. This algorithm allows us to solve any division problem from the onset. Also introduced in this chapter will be the protractor. Students will practice reading angle measurements and constructing angles.

Please continue to check your child's Daily Planner and Home Folder each evening. I have been finding notes/letters that have been sent home to parents in our classroom recycling and student desks or folders. Please sign the Planner daily. Thanks!

Sincerely,
Jennifer Kugath
