

Third Grade News

February 2020

Dear Parents and Families,

I would like to take this time to let you all know how much I appreciate all that you do at home for your child. Support from home makes a huge difference on the academic success of your children, and I sincerely thank you for your efforts.

Our calendar is as full as ever. We continue to power through our math lessons, and now that we're getting a good handle on the multiplication facts, our pace for the next units in math will speed up quite a bit.

We are still getting used to the new Pearson reading curriculum, and are also working hard on our more traditional English and Grammar lessons. As always, the more you can read with your child at home, the better! Even five minutes here and there makes a big difference.

We continue to study communities and ancient civilizations during our Social Studies time, and it has been interesting to have discussions about people's differing backgrounds. We are truly blessed to live in a country with such a diverse population, and learning about other cultures is a fascinating and enlightening experience. As for Science, we're continuing through our Life Science lessons, from the Plant and Animal Kingdoms to the tiniest parts of the cell!

All the Best,

Chris Dahle
