

Fourth Grade News

February 2021

Hello, Fourth Grade Families!

It's hard to believe we're half way through already!

The main thing we're working on in Math is FRACTIONS, FRACTIONS, and more FRACTIONS. How to compare them, add them, subtract them, and much much more! If you are working on anything with fractions, such as cooking, measuring, or pondering how much snow we got or how thick the ice is, make sure to do your thinking out loud in order to make the subject more real-life for your children. Thank you!

I have been very pleased with the level of effort the students have been making in our reading and spelling curriculum so far. We will continue to focus heavily on comprehension skills, as well as increase our writing activities.

It was such a pleasure to get back to Mass this last month, and although we can only go once every few weeks, we look forward to a return to some semblance of normalcy.

Have a great month!

-Mr. Dahle
