Ms. Hellevik's 4th Grade

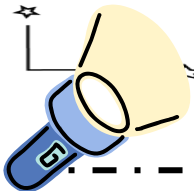

From Ms. Hellevik...

Spring has officially arrived! Our class has been enjoying as much outdoor time as we can squeeze into our learning schedule. As I reflect on the year, I am grateful to have had such a safe and fulfilling year with the students!

Reminders...

- **Please continue to send your students with a clean mask and water bottle every day!**

Upcoming Events...

- May 7 - No School, Staff Day
- May 28 - Last Day of School
- May 31- Summer Break Begins

In class this month....

Language Arts: During April, we will complete our biggest project of this year- State Research Projects! The students have excitedly worked to research their individual state. They will finish the project with a short presentation for their classmates. We have also continued work on analyzing text, identifying parts of speech, and using figurative language including similes, metaphors and idioms.

Math: We are working our way through Unit 7 which focuses heavily on word problems, division and patterns. We are challenging ourselves with multistep word problems by asking questions. What is the problem asking? What do I do with the numbers?

Science: Our focus continues to be in life science which has led us to explore genetics, life cycles, and evolution!

Social Studies: Students have explored the Industrial Revolution. We discussed the positive and negative impacts it had historically and on modern society.
